SUMMARY

I am Muhammad Nawaf Akbar, a final student of Informatics Management at Politeknik Negeri Padang with a strong passion for graphic design, UI/UX development, and Laravel development. I focus on creating digital products that combine aesthetic design with functional and user-centered experiences.

My design expertise is complemented by solid programming skills in Laravel, PHP, HTML, CSS, JavaScript, MySQL, Kotlin, and Flutter, enabling me to turn creative ideas into effective digital solutions. I am recognized for my leadership and time management abilities, as well as my capacity to work effectively in team-based environments.

Highly adaptable and eager to learn, I am constantly seeking new knowledge and challenges to expand my skill set and contribute to impactful digital innovations.

EDUCATION

Politeknik Negeri Padang

August 2023 - Present

D3 Informatic Management

IPK 3.91/4.00

EXPERIENCE

Coordinator of Publication and Documentation — PKKMB 2024

Politeknik Negeri Padang | August 2024

- Led the publication and documentation division during the 2024 student orientation program (PKKMB).
- Managed the creation of visual and digital content to support event promotion.
- Supervised a team to ensure timely and high-quality delivery of multimedia outputs.

Member — Student Executive Board (BEM)

Politeknik Negeri Padang | 2024 – 2025

- Actively contributed to student organization activities, focusing on internal coordination and student engagement.
- Collaborated in organizing campus events and initiatives.
- Developed teamwork, problem-solving, and adaptability skills through cross-departmental projects.

Graphic Design Division — Public Relations Department (Humas)

Politeknik Negeri Padang | 2024 – Present

- Designed promotional and branding materials for campus communication channels.
- Contributed to improving the visual identity of campus media.
- Worked closely with the PR team to ensure cohesive and effective design outputs.

Event Committee — Graphic Design Seminar 2024

Politeknik Negeri Padang | August 2024

- Served as part of the event division for the 2024 Graphic Design Seminar.
- Assisted in planning, organizing, and executing seminar activities.
- Coordinated with multiple divisions to ensure smooth event flow and participant engagement.

IT Support

PT.Prasetia Dwidharma | January 2026 - May 2026

- Provided technical support and troubleshooting for internal systems and daily operational needs.
- Managed and maintained business applications including Odoo and NetSuite to support workflow efficiency.
- Handled VPS server administration, monitoring, and basic deployment/configuration tasks.
- Supported collaboration and communication platform management using Lark.
- Assisted users with system issues, account management, and operational improvements across departments.

PROJECT

Lokal Freelance Marketplace

August 2025 - October 2025

Front End Development

- Developed a Laravel-based platform connecting local talent with businesses, featuring secure project listings and bidding.
- Key features: User profiles, portfolio galleries, and a project bidding system.
- Integrated Midtrans for a secure payment gateway.

BGD_Hydrofarm - E-Commerce Website

September 2025 - October 2025

Full Stack Development

- Engineered a responsive and user-friendly online store using Laravel to provide a seamless shopping experience.
- Key features: Dynamic product catalog, shopping cart management, and a secure checkout process.
- Integrated Midtrans for a secure payment gateway.

School Administration System

May 2025 - June 2025

Full Stack Development

- Developed a comprehensive web-based administration system using Laravel, featuring a modern dashboard built with Filament.
- Objective: To streamline the management of structured school data, including student records, schedules, and grades.

Online Questionnaire Platform

November 2024 - December 2024

Full Stack Development

- Developed an interactive web application for creating and analyzing survey data.
- Technology: Built with native PHP and MySQL for robust database management, utilizing Bootstrap for a responsive design.

Web Interface Showcase

January 2024 - February 2024

Frontend Development

- Designed and built a visually engaging web interface with a focus on visual balance and smooth animations.
- Technology: Coded using pure HTML, CSS, and JavaScript to demonstrate core frontend design and development skills.

Design & Prototype Series

January 2025 - Present

UI/UX Design

- Designed a series of modern, user-friendly interfaces for various platforms, including mobile apps, dashboards, and landing pages.
- Process: Included wireframing, high-fidelity mockups, and creating interactive prototypes to ensure a seamless user experience.
- Primary Tool: Figma.

Everlast Booking System

February 2026 - March 2026

Full Stack Development

- Developed an end-to-end booking and management platform for a photography studio to replace manual reservation workflows with a fully automated digital system.
- Built a dynamic frontend allowing clients to explore portfolios, select service packages, and complete online bookings seamlessly.
- Integrated Midtrans as a secure payment gateway supporting both down payment and full payment transactions.
- Implemented real-time automated scheduling through Google Calendar API integration to streamline booking management.
- Developed an admin dashboard featuring automated Cash Flow Management for tracking revenue and freelancer expenses accurately.

SmartPalm Digital Ecosystem

March 2026 – May 2026

Full Stack Development

- Developed a web-based digital ecosystem platform to support operational management and digital transformation in the palm and plantation industry.
- Built the system using Laravel, MySQL, and Tailwind CSS to deliver a scalable backend and responsive user experience.
- Designed integrated modules for plantation data management and monitoring to support operational visibility and decision-making.
- Implemented Banana AI, an AI-powered image recognition feature capable of identifying trees and fruits from uploaded images.
- Enhanced productivity and analytical capabilities by enabling users to assess plantation conditions more efficiently.

SKILLS

- Soft Skills : Time Management, Problem Solving, Leadership, Team Work, Critical Thinking.
- Hard Skills : Dart, Flutter, PHP, Laravel, MySQL, Javascript, Css, Bootstrap, Python, Wordpress.
- Software Skills : XAMPP, Microsoft Office, Visual Studio code, Visual Studio Community, Figma, Postman, Android Studio, Canva, Adobe Photoshop, Capcut.

CERTIFICATE

- Java Fundamental by Oracle Academy 20 April 2024
- Database Foundations by Oracle Academy 1 July 2024
- Database Programing with SQL by Oracle Academy 1 July 2024
